

UXR TORAYCA T1100G

The UXR series is Okuma's newest and highest level creation. Okuma partnered with Toray in Japan and used the very latest Nano-carbon technology (T1100G) to put together a blank that is lighter and more sensitive than anything we have made before. The feel of this rod has surprised even the most experienced anglers and once loaded up, left them wanting for more. We coupled this incredible blank with the very best Fuji components including a fully concealed reel seat so that the thread is hidden and it is ergonomic in the hand. This is an incredible package that combines the ultimate in lightweight and sensitivity with nano-technology that delivers strength and power when needed.

| NANOMATRIX X

The Nanomatrix X is a redesigned version of the rod we love. We have not veered far from the blank we know and love but we have upgraded the look, added a custom carbon reel seat and reduced the component weight to make the whole set up lighter and more sensitive. The Nanomatrix X is the ultimate in sensitivity which makes it the perfect softbait partner in both fresh and saltwater.

MAKAIRA

Makaira rods are fully rolled with a roller tip – Makaira rods feature an ultra-durable and strong Carbon composite blank to deliver ultimate lifting power, incorporating the highest quality ALPS componentry available with a straight or bent butt (purchased separately) and finished with a custom leather wrap foregrip.

- Carbon composite rod blank technology
- ALPS deep press 316 stainless guide frames
- Hard Zirconium guide inserts for compatibility with braided lines
- Custom ALPS aluminum reel seats with Abalone under lay
- IGFA tournament rods with full straight or bent aluminum rod butts
- Shrink tube grips for ultimate durability
- ALPS roller guides on trolling rods with large knot clearance
- Aluminum gimbals on trolling and popping rods

PCH Custom

The Okuma PCH Custom Game Rods are constructed using the latest carbon composite technology. Combined with cutting edge components, including a carbon butt design that reduces weight by over 25% of comparable game rods, these premium game rods offer un-rivalled strength and stopping power.

- Carbon composite rod blank technology
- Alps deep press 316 stainless steel guide frames and roller guides with large knot clearance
- IGFA tournament rated rods
- Aluminium gimbals & quality rubber butt caps
- Okuma custom carbon straight or bent rod butts reduce weight by over 25% while retaining power and strength
- Shrink tube grips for ultimate durability
- Softer tip making it more accommodating for braid setups

UFR

SKULLDRAGGER 

DETHRONER

SHALLOW STALKER

ROCK REAPER 

Scott and Mig from Fishing & Adventure set out to design their ideal range of rods. With a little help from Okuma and its patented UFR technology, coupled with mandatory on the water testing, together they have created a range of rods. The skulldragger for tackling monster snapper or kingies on bait, the dethroner for turning the heads of monster kings. The shallow stalker which is the ultimate heavy duty soft baiting rod for nailing those 20+lb snapper out of the shallows and the rock reaper is built for big fish off the rocks!

S-JOINT

Okuma's "S Joint" manufacturing process changes the game with how large diameter rods are put together. Not only does it make it a breeze to put together and pull apart, once together it provides the highest performing fit we have been able to achieve. This maximises the anglers casting distance, strength of the rod and general rod feel.

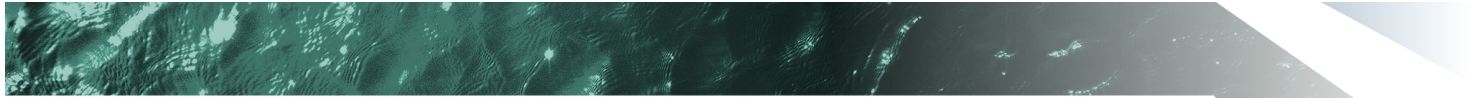

TOURNAMENT CONCEPT X

The Tournament Concept series of rods are built using Okuma's patented Unidirectional Fibre Reinforcement and the latest S-joint technology. These rods, designed for Kiwi anglers by the team at Composite Developments, are manufactured using a patented process with an outer layer of longitudinal fibres around the rod blank to significantly increase strength and power in the tip section. This offers lifting power and strength up to four times conventional graphite rods. There is a rod in the range for almost every method and style of fishing, they are durable, powerful and can be fished by all anglers with confidence.

NEW **TOURNAMENT** *CONCEPT X* **SPL**

The tournament concept SPL series is the start of a new generation at Okuma. We worked closely with junior and female anglers to customise a rod for them. In doing so, we found some magic and created a staple that should be in everybody's collection. We utilised a forgiving yet responsive blank, shortened the distance to the reel seat, made the grips smaller and finished the rod with components and a style that will set you part on any boat.

X-FACTOR II SLIM

This series was designed to meet the expectations and demands of the Kiwi angler: tough, durable with a crisp action and delivered at an affordable price that the everyday angler can afford. All of this has been incorporated into our most successful and longest standing rod series to date. New cosmetics and new models are always being added to keep this series at the fore front of leading design.

Ceymar

The Ceymar range has been designed for the entry to mid-level price points creating an ultra-strong & durable blank using 26T blank construction and finished with eye catching cosmetics. Incorporating a Med Fast Action to deliver excellent casting & sensitivity in a more palatable price range.

MODEL	DESCRIPTION	LENGTH FT	PIECES	LINE WT. KG (PE)	LURE WT. G	BLANK	BUTT ASSEMBLY	GUIDES	RRP
OKROCYC632SG	CAST O/HEAD CEYMAR	6'3"	2	(1-3)	50-180	FIBREGLASS	EVA	OKC	\$129.99

CORTEZ

The Cortez Jig Rod has been specifically designed to match the Cortez 10 reel in both graphics and action. Using a mix of 26T carbon and glass in the blank we have built an ultra strong blank that will withstand serious punishment.

MODEL	DESCRIPTION	LENGTH FT	PIECES	LINE WT. KG (PE)	LURE WT. G	BLANK	BUTT ASSEMBLY	GUIDES	RRP
OKROCOC501MH	JIG CORTEZ O/HEAD	5'0"	1	(2-5)	150-300	CARBON	EVA	OKC	\$169.99

SABIKI

The Okuma NG (no guide) Sabiki rod is revolutionary, not only is it longer and can “inhale” most standard sabiki’s on the market, its unique design means it can still bend and flex like a rod, not costing you precious bait. Couple it together with an overhead or spinning reel and it is the safe and convenient tool to help catch bait and other species.

MODEL	DESCRIPTION	LENGTH FT	PIECES	LINE WT. KG (PE)	LURE WT. G	BLANK	BUTT ASSEMBLY	GUIDES	RRP
NEW OKRONGS732SABIKI	BOAT SPIN SABIKI	7'3"	2	4-10	7-28	E GLASS	EVA	SIC	\$99.99

VOYAGER COMBO

ARIA 30 Reel Features:

- Multi-disc, Japanese oiled felt drag washers
- 1 ball bearing drive for smoothness and durability
- Precision machine cut brass pinion gear
- Corrosion resistant graphite body and rotor
- Corrosion-resistant stainless steel bail wire
- RESII: Computer balanced Rotor Equalizing System

Rod Features:

- Convenient nylon travel bag
- Composite rod blanks for durability
- 5-pcs breakdown for easy transportation
- EVA foam grips
- CFR: Cyclonic Flow Rotor technology
- Machined aluminum, anodized spool
