INSPIRED FISHING

2024 TACKLE

# UPO Stick

Features:

- Durable and powerful fiberglass rod blanks.
- Longitudinal low design glass fiber tip section design.
- Aluminum oxide guide inserts.
- Comfortable EVA grips.
- Graphite pipe reel seat with aluminum hoods.

## Unidirectional Fiber Reinforcement (UFR)

Okuma's Unidirectional Fiber Reinforcement (UFR) technology is a breakthrough design in rod strength and sensitivity. This patented manufacturing process utilizes an outer layer of longitudinal fibers around the rod blank to significantly increase the rods strength and power in the tip section. These fibers increase the rod's lifting power and maximum strength of the rod by up to four times that of a standard rod blank. The end result is an extremely powerful and durable rod anglers can fish with confidence.

## PROMETHEUS II

Delivering proven performance and premium Fuji components, the Okuma's Prometheus Rods are perfect for a range of finesse applications and available for a great price.

**Features:**

- Sensitive yet strong carbon blanks
- Fuji guides
- Fuji reel seat
- Split grip butt design (Casting model)
- Premium quality EVA handle
